

Aroma Beads (Baked) Instructions

Items Required

Aroma Beads and Oven or Toaster Oven

Fragrance

Glass Jar with lid (for mixing)

Liquid Candle Dye (optional)

Metal Cookie Sheet

Metal Cookie Cutter

Nail or Screw for hole

Packaging

Instructions

First make your scented & colored Aroma Beads as directed. (See instructions for Aroma Beads)

Choose metal cookie cutter

Lay on a metal non-stick cookie sheet.

Lay a nail or screw (head down) where you want the hole.

Fill each cookie cutter with scented beads about $\frac{1}{4}$ to $\frac{1}{2}$ inches deep.

Bake in oven or toaster oven at 350 degrees for about 4 minutes less time if you like them to be a little on the bumpy side, use your judgment and keep an eye on them!

Remove from oven with pot holders and let cool.

They may smoke a little bit that is normal.

After they have cooled remove from tray and remove from mold. You can also put them in the freezer to cool for easier removal.

I like adding glitter to my beads prior to baking. Experiment and make them unique!

Depending upon which fragrance you use the scent may last up to 30 days or longer.
